leadership lessons from

EAGLE

EAGLES FLY WITH EAGLES

eagles fly alone at a high altitude and not with sparrows or other small birds like geese. birds of a feather flock together. no other bird goes to the height of the eagle.

eagles fly with eagles.
never in a flock...

EAGLES REMAIN FOCUSSED

eagles have strong vision, which focuses up to 5 kms from the air. When an eagle sites prey-even a rodent from this distance, he narrows his focus on it and sets out to get it !

No matter the obstacle, the eagle will not move his focus from the prey until he grabs it

EAGLES STEER CLEAR OF THE OUTDATED

eagles do not eat
dead things. it feeds
on fresh prey. vultures
eat dead animals but
not eagles...

**steer clear out of outdated & old information.
do your research well always.**

3

EAGLES RELISH CHALLENGES

eagles is the only bird that loves the storm. The eagle uses the wings of the storm to rise & is pushed up higher.

once it finds the wings of the storm the eagle stops flapping & uses the pressure of the raging storm to soar the clouds & glide. this gives eagle an opportunity to rest its wings. in the meantime all the other birds hide in the leaves & branches of trees.

we can use the storms of our lives (obstacles, troubles etc.) to rise to greater heights. Achievers relish Challenges & use them profitably.

4

EAGLES PREPARE THEMSELVES FOR THE NEXT GENERATION & TRAIN THEM FOR THE FUTURE

THE PROCESS BY WHICH MALE EAGLE COLLECT TWIGS ,THORNS AND SOFT GRASS AND FINALLY PLUCK HIS FEATHERS TO BUILD THE NEST FOR FEMALE EAGLE TO LAY EGGS. HE PREPARES THE NEST & SHE LAYS EGGS AND PROTECT.THEY BREAK THE COMFORT ZONE OF LITTLE NEW BORN EAGLESAND MAKE THEM FLAP THEIR WING TO LEARN FLYING.

THE EAGLE HAS THE LONGEST LIFE SPAN OF IT'S SPECIES.

IT CAN LIVE UP TO 70 YEARS...

**BUT TO REACH THIS AGE,
IT HAS TO TAKE ONE OF THE HARDEST DECISIONS IN LIFE**

EAGLES DISCARD WHAT IS WORTHLESS & RENEW THEMSELVES

AT 40 THE TALONS & BEAK OF EAGLES BECOMES WEAKER & FETCHES THEM NO MORE PREY. OLD WINGS BECOMES HEAVY & STUCK TO ITS CHEST MAKES IT DIFFICULT TO FLY. 2 OPTIONS DIE OR GO THROUGH A PAILFUL PROCESS WHICH LASTS 150 DAYS. FOR THE PROCESS EAGLE GOES TO THE MOUNTAIN TOP & SITS ON IT'S NEST. KNOCKS IT'S BEAK AGAINST A ROCK TILL IT IS PLUCKED OUT. PLUCKS IT'S TALONS AFTER IT GROWS BACK PLUCK ENTIRE FEATHERS UNTIL HE'S ENTIRELY BARE. AFTER 150 DAYS EAGLES TAKES IT FAMOUS REBIRTH TO FLY HIGH & TO LIVE FOR ANOTHER 30 YEARS !!!
