

# The Lions

Project: "Wild animals: lions"

Module: 5b

Student: Skorokhodov Nikita

School № 54

Teacher: Sergeeva Elena Vladimirovna

Lions are the  
biggest cats  
in the world.

Lions are orange and brown. They have got long sharp teeth.

Lions have got strong jaws and powerful legs.

Male lions have got manes. Female lions haven't got manes.

Lions are excellent swimmers.

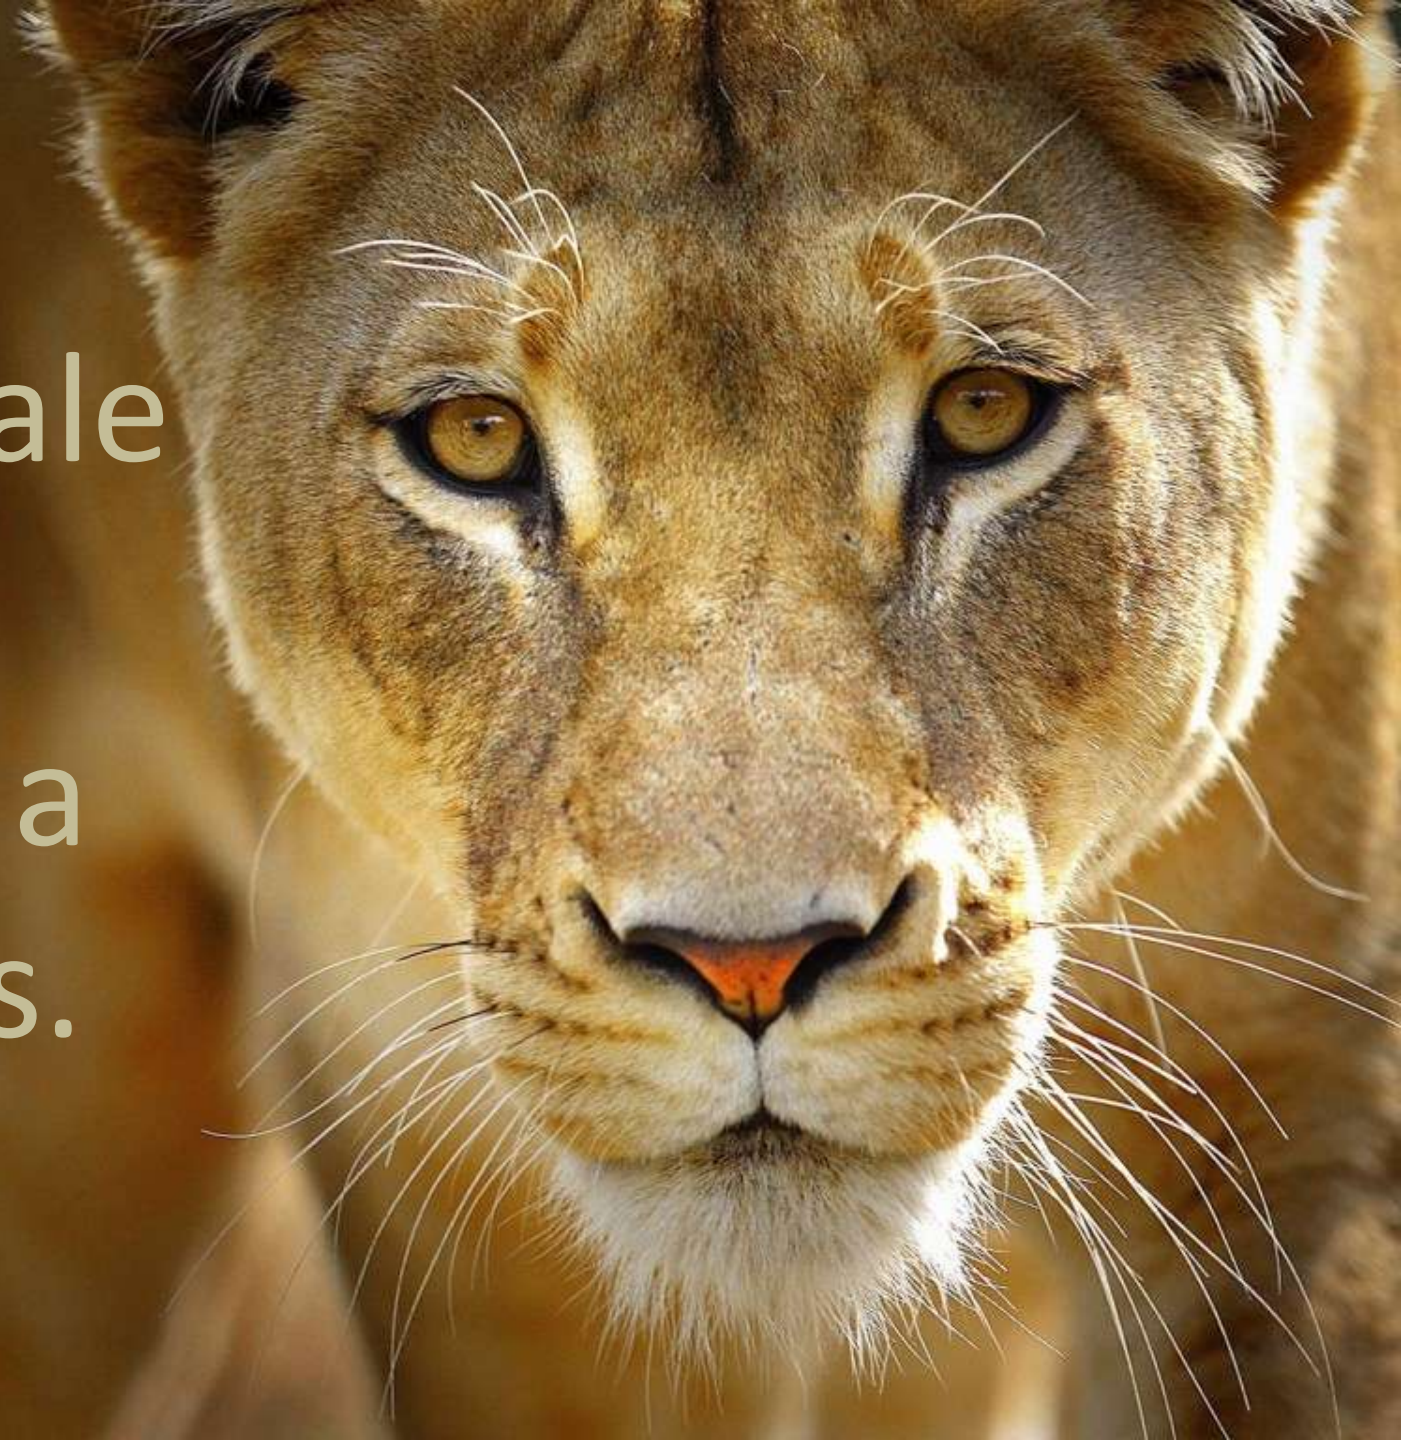

Most lions live in a group called a pride.

A female  
lion is  
called a  
lioness.

**Lionesses are  
better hunters  
than males and  
do most of the  
hunting for a  
pride.**

Lions usually feed on animals like zebras, giraffes, rhinos, hippos. Sometimes they eat smaller animals like hares and birds.

A baby lion is called a cub.

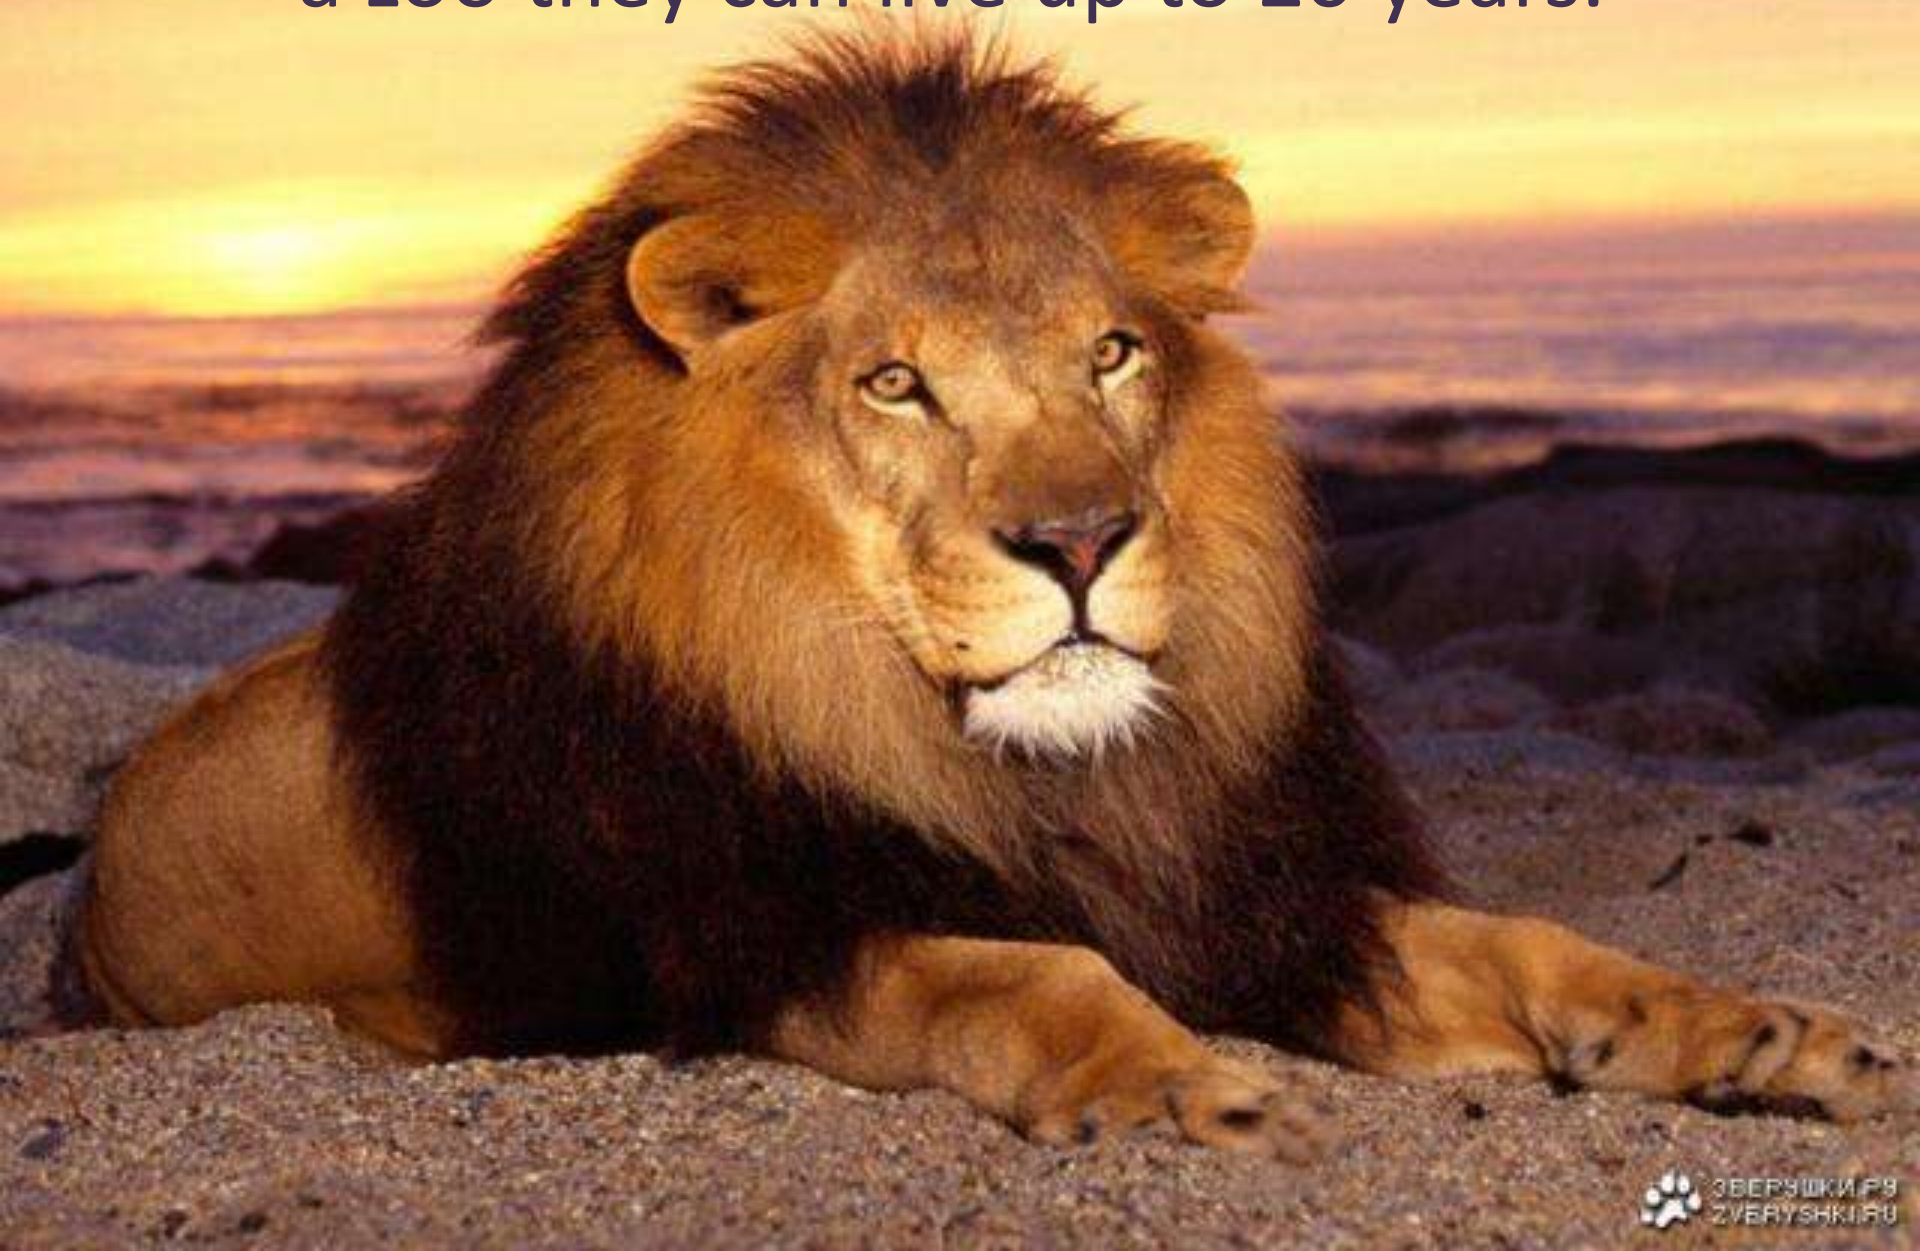

- For the first three months the cubs drink milk from their mother and later, they move on to meat of other animals.

A lion in the wild can live up to 14 years but in a zoo they can live up to 20 years.

**Lions show their affection by rubbing their heads against another's head, face or neck.**

Thanks for  
attention!
